[a] Total labor force by place of residence, including workers involved in trade disputes. Employment includes self-employed, unpaid family, and domestic workers.

[b] Range as shown is at the 90% level of confidence.

NOTE: These labor force data are supplied by the U.S. Department of Labor.

HIGHLIGHTS California's seasonally adjusted unemployment rate for September was 7.7 percent, up from the 7.3 percent in August. On the positive side, the unemployment rate improved slightly (from 7.8 percent to 7.6 percent) between the second and third quarter of 1991. During September in California, seasonally adjusted employment increased by 57,000 over the month while unemployment increased by 64,000. The number of job losers increased from 594,400 in August to 604,900 in September. The number of job leavers decreased by 3,200 during the month. The number of people unemployed for 27 or more weeks decreased in September; however, the number of these long-term unemployed is still at a relatively high level. The national civilian seasonally adjusted unemployment rate for September was 6.7 percent, down from the 6.8 percent in August.

Total nonagricultural wage and salary employment, not seasonally adjusted, increased by 91,000 from 12,768,900 in August to 12,859,900 in September. The largest increase in employment was in the government sector with a gain of 89,500 jobs. This increase, which primarily occurred in the state and local education components, is typical for the beginning of a school year. Private education also posted a gain of 10,200 jobs. During September, employment in the trade and services sectors increased by 3,700 and 8,600, respectively. After adjusting for seasonality, the service sector was the only major industry group to add jobs, a gain of 2,900. Within this sector only health services and amusement industry had notable increases.

Since September of last year total nonagricultural wage and salary employment, not seasonally adjusted, has decreased by 60,900, a 0.5 percent drop. The construction and durable goods manufacturing sectors reported the greatest job losses. Within construction, special trade contractors and general building contractors lost jobs while heavy construction remained nearly unchanged. Reflecting reduced defense expenditures, the industrial machinery, electronic equipment, aircraft and parts, and instruments and related components reported large employment declines over last year. However, recent monthly declines were less than last year in goods producing sectors.

*Because of a relatively small sample, the monthly estimates for data in Table 2 do not always appear to reflect real labor market conditions. Therefore, these figures are a three-month moving average instead of monthly data. For example, July's data are an average of May, June, and July. August's data are an average of June, July, and August.

Prepared in cooperation with the Bureau of Labor Statistics and the Employment and Training Administration of the U.S. Department of Labor by the Labor Market Information Division, Guides and Economic Research Group, P.O. Box 826880, Sacramento CA 94280-0001, (916) 427-4660.

State of California / Employment Development Department

NOTE

Employment, average hours, and average earnings estimates for the current month are preliminary and subject to revision. These data are also revised annually, in February, to reflect benchmark changes.

FOOTNOTES TO TABLES

A. Does not include employers, own-account workers, unpaid family workers, domestic servants and agricultural workers. Figures for the current month are preliminary and are subject to revision.

B. Does not include force-account and government construction workers.

C. Includes all civilian employees of Federal, State and local governments regardless of the activity in which the employee is engaged.

D. Includes all employees at the city and county of San Francisco.

E. Average hours and earnings are based upon data for full-time and part-time production and related workers in manufacturing and mineral extraction industries, construction workers in construction and nonsupervisory employees and working supervisors in other industries. Average gross weekly and hourly earnings include overtime pay and premium wages for late-shift work. Attention is directed to the fact that these are not wage rates but are averages of the gross earnings.

[a] Total labor force by place of residence, including workers involved in trade disputes. Employment includes self-employed, unpaid family, and domestic workers.

[b] Range as shown is at the 90% level of confidence.

NOTE: These labor force data are supplied by the U.S. Department of Labor.

HIGHLIGHTS The Commerce Department reported that the preliminary estimate of the Gross National Product (GNP) rose by 2.4 percent during the 3rd quarter of 1991. Even though this was the largest increase in this measure in two and one-half years, it pales when compared with past recoveries. In addition, the Conference Board said its Consumer Confidence Index dropped sharply in October to 60.4, only six points above the lowest value recorded during the 1981-1982 recession. Other data on the state of the U. S. economy released in October revealed ongoing weakness and a tepid recovery. The manufacturing sector, especially the domestic auto industry, reported weak performance compared with last year. New housing construction declined in September after five months of gains. Also, most major retail firms reported that retail sales remained soft. Overall, the economic recovery in the nation and California are lacking the typical jump in consumer spending, fixed business investment, and residential construction.

California's seasonally adjusted unemployment rate for October was 7.8 percent, up from the 7.7 percent in September. During the past month the state's seasonally adjusted employment decreased by 33,000 over the month while unemployment increased by 13,000. The number of job losers decreased from 604,900 in September to 591,000 in October. The number of job leavers decreased by 200 during the month. The number of people unemployed for 27 or more weeks decreased by 20,600 during the month. The national civilian seasonally adjusted unemployment rate for October was 6.8 percent, up from the 6.7 percent in September.

Total nonagricultural wage and salary employment, not seasonally adjusted, increased by 36,300 from 12,835,500 in September to 12,871,800 in October. The largest increase in employment was in the government sector with a gain of 50,000 jobs. This increase, which occurred in the state and local public education components, is typical for the beginning of a school year; private educational services posted a gain of 12,700 jobs. During September, employment in the services and trade sectors increased by 9,800 and 1,900, respectively. As expected, the largest decrease occurred in the manufacturing sector with most of the job losses in the food and kindred products (food processing) components. Since October of last year, total nonagricultural wage and salary employment, not seasonally adjusted, has decreased by 81,400, a 0.6 percent drop.

*Because of a relatively small sample, the monthly estimates for data in Table 2 do not always appear to reflect real labor market conditions. Therefore, these figures are a three-month moving average instead of monthly data. For example, July's data are an average of May, June, and July. August's data are an average of June, July, and August.

Prepared in cooperation with the Bureau of Labor Statistics and the Employment and Training Administration of the U.S. Department of Labor by the Labor Market Information Division, Guides and Economic Research Group, P.O. Box 826880, Sacramento CA 94280-0001, (916) 427-4660.

NOTE

Employment, average hours, and average earnings estimates for the current month are preliminary and subject to revision. These data are also revised annually, in February, to reflect benchmark changes.

FOOTNOTES TO TABLES

A. Does not include employers, own-account workers, unpaid family workers, domestic servants and agricultural workers. Figures for the current month are preliminary and are subject to revision.

B. Does not include force-account and government construction workers.

C. Includes all civilian employees of Federal, State and local governments regardless of the activity in which the employee is engaged.

D. Includes all employees at the city and county of San Francisco.

E. Average hours and earnings are based upon data for full-time and part-time production and related workers in manufacturing and mineral extraction industries, construction workers in construction and nonsupervisory employees and working supervisors in other industries. Average gross weekly and hourly earnings include overtime pay and premium wages for late-shift work. Attention is directed to the fact that these are not wage rates but are averages of the gross earnings.

[a] Total labor force by place of residence, including workers involved in trade disputes. Employment includes self-employed, unpaid family, and domestic workers.

[b] Range as shown is at the 90% level of confidence.

NOTE: These labor force data are supplied by the U.S. Department of Labor.

HIGHLIGHTS California's seasonally adjusted unemployment rate for November was 7.4 percent, down from the 7.8 percent in October. During the past month, the state's seasonally adjusted employment increased by 45,000 while unemployment decreased by 63,000. The number of job losers increased from 591,900 in October to 629,900 in November. The number of job leavers increased by 4,600 during the month. The national civilian seasonally adjusted unemployment rate for November was 6.8 percent, the same as in October.

California's labor market remains weak. IBM and McDonnell Douglas both announced new plans for large layoffs (both of these firms have already laid off many thousands of workers this year. The losses of California's payroll jobs have not abated.

o In November, seasonally adjusted employment fell in all the major sectors, in total a drop of 24,900 jobs.

o Health services continues to add jobs. In November 1,300 jobs, seasonally adjusted, were added.

o California average weekly hours in manufacturing remained unchanged in October at 40.8 while average weekly overtime hours in manufacturing fell from 4.2 hours in September to 3.9 in October. Both of these are indicators of increased factory production or, in this case, lack of it.

Prepared in cooperation with the Bureau of Labor Statistics and the Employment and Training Administration of the U.S. Department of Labor by the Labor Market Information Division, Guides and Economic Research Group, P.O. Box 826880, Sacramento, CA 94280-0001.

*Because of a relatively small sample, the monthly estimates for data in Table 2 do not always appear to reflect real labor market conditions. Therefore, these figures are a three-month moving average instead of monthly data. For example, July's data are an average of May, June, and July. August's data are an average of June, July, and August.

Prepared in cooperation with the Bureau of Labor Statistics and the Employment and Training Administration of the U.S. Department of Labor by the Labor Market Information Division, Guides and Economic Research Group, P.O. Box 826880, Sacramento CA 94280-0001, (916) 427-4660.

NOTE

Employment, average hours, and average earnings estimates for the current month are preliminary and subject to revision. These data are also revised annually, in February, to reflect benchmark changes.

FOOTNOTES TO TABLES

A. Does not include employers, own-account workers, unpaid family workers, domestic servants and agricultural workers. Figures for the current month are preliminary and are subject to revision.

B. Does not include force-account and government construction workers.

C. Includes all civilian employees of Federal, State and local governments regardless of the activity in which the employee is engaged.

D. Includes all employees at the city and county of San Francisco.

E. Average hours and earnings are based upon data for full-time and part-time production and related workers in manufacturing and mineral extraction industries, construction workers in construction and nonsupervisory employees and working supervisors in other industries. Average gross weekly and hourly earnings include overtime pay and premium wages for late-shift work. Attention is directed to the fact that these are not wage rates but are averages of the gross earnings.

NOTE: These labor force data are supplied by the U.S. Department of Labor.

* These figures have not been revised to reflect the new seasonal adjustment factors.

HIGHLIGHTS California's seasonally adjusted unemployment rate for December was 7.7 percent, up from the 7.4 percent in November. During the past month, the state's seasonally adjusted employment increased by 85,000 while unemployment increased by 60,000. The number of job losers increased from 629,900 in November to 650,200 in December. The number of job leavers decreased by 13,800 during the month. The national civilian seasonally adjusted unemployment rate for December was 7.1 percent.

December's payroll employment report reveals ongoing weakness in California's labor market:

- Nonagricultural employment increased in December by 3,200, but this was far less than seasonally expected. The hiring normally associated with the holiday season, in particular retail trade, was limited this year due to the recession.
- Job gains in service producing industries were offset by reductions in goods producing firms. Health services remains one of the only industries to continually add jobs, with a gain in November of 1,500. Since December 1990, health sevices has added 22,000 jobs.
- California average weekly hours in manufacturing increased in November to 40.9. Average weekly overtime hours in manufacturing increased to 4.0 hours.

General Motors Corporation announced its planned closure of 21 plants and reduction of 74,000 jobs in the next three years. The General Motors' plant in Van Nuys is one of the plants scheduled to close in August of this year.

[*] Because of a relatively small sample, the monthly estimates for data in Table 2 do not always appear to reflect real labor market conditions. Therefore, these figures are a three-month moving average instead of monthly data. For example, July's data are an average of May, June, and July. August's data are an average of June, July, and August.

Prepared in cooperation with the Bureau of Labor Statistics and the Employment and Training Administration of the U.S. Department of Labor by the Labor Market Information Division, Guides and Economic Research Group, P.O. Box 826880, Sacramento CA 94280-0001, (916) 427-4660.

State of California / Employment Development Department

NOTE

Employment, average hours, and average earnings estimates for the current month are preliminary and subject to revision. These data are also revised annually, in February, to reflect benchmark changes.

FOOTNOTES TO TABLES

A. Does not include employers, own-account workers, unpaid family workers, domestic servants and agricultural workers. Figures for the current month are preliminary and are subject to revision.

B. Does not include force-account and government construction workers.

C. Includes all civilian employees of Federal, State and local governments regardless of the activity in which the employee is engaged.

D. Includes all employees at the city and county of San Francisco.

E. Average hours and earnings are based upon data for full-time and part-time production and related workers in manufacturing and mineral extraction industries, construction workers in construction and nonsupervisory employees and working supervisors in other industries. Average gross weekly and hourly earnings include overtime pay and premium wages for late-shift work. Attention is directed to the fact that these are not wage rates but are averages of the gross earnings.

NOTE: The numbers in the narrative section on labor market conditions and the January 1992 data in Table 1 reflect the most recent annual revisions. The historical data in Table 1 will be available in the February report. Revised wage and salary employment data will be available in the March report. These labor force data are supplied by the U.S. Department of Labor.

HIGHLIGHTS

LABOR MARKET CONDITIONS California's seasonally adjusted unemployment rate for January was 8.1 percent, up from the 7.7 percent in December. During the past month, the state's seasonally adjusted employment decreased by 173,000 while unemployment increased by 61,000. The number of job losers increased from 650,200 in December to 779,400 in January. The number of job leavers decreased by 12,800 during the month. The national civilian seasonally adjusted unemployment rate for January was 7.1 percent, unchanged from December.

INDUSTRY EMPLOYMENT, EARNINGS AND HOURS

- Payroll employment in January fell by 239,100. Normally, there is a decrease in January employment after the holiday season. The decrease this year was less than normal due to the fact that employers did not hire as many people as usual in November and December due to the recession. The seasonally adjusted gain of 41,100 in January reflects this disruption of seasonal factors, and should not be considered as a real job increase.

- The retail trade and services sectors are responsible for most of the job losses in January, again reflecting the effect of the recession on holiday hiring patterns. Combined these two sectors lost 141,300 jobs.

- California average weekly hours and average weekly overtime hours in manufacturing showed no appreciable change in December. Average weekly hours in manufacturing increased from 40.9 in November to 41.5 in December. This is consistent with manufacturing hours increases during this period in prior years. Average weekly overtime hours in manufacturing was unchanged in December.

*Data supplied by the U.S. Department of Labor from their Current Population Survey. No comparable data are available for areas within California. The sample upon which the data in Table 2 is based was reduced in April 1988. The result has been volatile monthly unemployment estimates for specific labor market groups. Therefore, data show a THREE-MONTH MOVING AVERAGE instead of monthly data. For example, July's data are an average of May, June, and July.

*The data for this report are preliminary and will be revised at benchmark time, March 27, 1992. The benchmark process has been delayed due to the implementation of the new Business Establishment List (BEL) program in the ES-202 process. The wage and salary numbers in this report are still based on the March 1990 benchmark.

Prepared in cooperation with the Bureau of Labor Statistics and the Employment and Training Administration of the U.S. Department of Labor by the Labor Market Information Division, Guides and Economic Research Group, P.O. Box 826880, Sacramento CA 94280-0001, (916) 427-4660.

State of California / Employment Development Department

NOTE

Employment, average hours, and average earnings estimates for the current month are preliminary and subject to revision. These data are also revised annually, in February, to reflect benchmark changes.

FOOTNOTES TO TABLES

A. Does not include employers, own-account workers, unpaid family workers, domestic servants and agricultural workers. Figures for the current month are preliminary and are subject to revision.

B. Does not include force-account and government construction workers.

C. Includes all civilian employees of Federal, State and local governments regardless of the activity in which the employee is engaged.

D. Includes all employees at the city and county of San Francisco.

E. Average hours and earnings are based upon data for full-time and part-time production and related workers in manufacturing and mineral extraction industries, construction workers in construction and nonsupervisory employees and working supervisors in other industries. Average gross weekly and hourly earnings include overtime pay and premium wages for late-shift work. Attention is directed to the fact that these are not wage rates but are averages of the gross earnings.

[a] Total labor force by place of residence, including workers involved in trade disputes. Employment includes self-employed, unpaid family, and domestic workers.

[b] Range as shown is at the 90% level of confidence.

NOTE: These labor force data are supplied by the U.S. Department of Labor.

HIGHLIGHTS California's seasonally adjusted unemployment rate for February was 8.7 percent, up from the 8.1 percent in January. During the past month, the state's seasonally adjusted employment increased by 22,000 while unemployment increased by 101,000. The number of job losers increased from 779,400 in January to 895,400 in February. The number of job leavers increased by 3,800 during the month. The national civilian seasonally adjusted unemployment rate for February was 7.3 percent, up from the 7.1 percent in January.

- Payroll employment grew by 14,300 in February; however, this growth was well below the seasonally expected growth. After adjusting for seasonal factors, total nonagricultural employment fell by 21,400. Unusually heavy rains that fell throughout California during February caused significant layoffs in all the construction sector's components. Construction firms reported a 17,500 seasonally adjusted job loss.

- After seasonal adjustments, the services and trade sectors were the only major industry groups to add jobs; combined they added 6,000 jobs.

- California average weekly hours and average weekly overtime hours in manufacturing showed slight declines in January, of 1.2 and 0.4 hours, respectively.

Prepared in cooperation with the Bureau of Labor Statistics and the Employment and Training Administration of the U.S. Department of Labor by the Labor Market Information Division, Guides and Economic Research Group, P.O. Box 826880, Sacramento, CA 94280-0001.

*Because of a relatively small sample, the monthly estimates for data in Table 2 do not always appear to reflect real labor market conditions. Therefore, these figures are a three-month moving average instead of monthly data. For example, July's data are an average of May, June, and July. August's data are an average of June, July, and August.

*Average hours and earnings are based upon data for full-time and part-time production and related workers in manufacturing industries. Average gross weekly and hourly earnings include overtime pay and premium wages for late-shift work. These are not wage rates but are averages of gross earnings. Data are preliminary and subject to change.

**Data for 1991 are preliminary and will be revised at benchmark time, March 27, 1992. See note on Table 4.

* Note: The wage and salary employment data for this report normally reflect the prior year March benchmark to the ES-202 data (March 1991). However, this process has been delayed due to the implementation of the new Business Establishment List (BEL) implementation of the new Business Establishment List (BEL) program in the ES-202 process. The wage and salary numbers in this report are still based on the March 1990 benchmark. Data based on the March 1991 benchmark will be available in next month's report.

State of California / Employment Development Department

NOTE

Employment, average hours, and average earnings estimates for the current month are preliminary and subject to revision. These data are also revised annually, in February, to reflect benchmark changes.

FOOTNOTES TO TABLES

A. Does not include employers, own-account workers, unpaid family workers, domestic servants and agricultural workers. Figures for the current month are preliminary and are subject to revision.

B. Does not include force-account and government construction workers.

C. Includes all civilian employees of Federal, State and local governments regardless of the activity in which the employee is engaged.

D. Includes all employees at the city and county of San Francisco.

E. Average hours and earnings are based upon data for full-time and part-time production and related workers in manufacturing and mineral extraction industries, construction workers in construction and nonsupervisory employees and working supervisors in other industries. Average gross weekly and hourly earnings include overtime pay and premium wages for late-shift work. Attention is directed to the fact that these are not wage rates but are averages of the gross earnings.

HIGHLIGHTS California's seasonally adjusted unemployment rate for March was 8.5 percent, down from the 8.7 percent in February. During the past month, the state's seasonally adjusted employment increased by 4,000 while unemployment decreased by 39,000. The number of job losers decreased from 895,400 in February to 834,300 in March. The number of job leavers increased by 17,900 during the month. The national civilian seasonally adjusted unemployment rate for March was 7.3 percent, the same as in February.

The March 1991 benchmark revisions of Current Employment Statistics survey of California's payroll employment estimates has been completed. This process reconciles the estimates based on March 1990 unemployment insurance tax reports with the March 1991 tax report. The benchmarking process resulted in lower employment estimates. These new estimates indicate that California has lost 504,800 jobs, after adjusting for seasonality, since the recession began in July of 1990.

Payroll employment grew by 67,300 in March; however, over 40 percent of the growth was in construction. This large increase reflected workers recalled after weather-related employment losses in February. After adjusting for seasonal factors, total nonagricultural employment fell by 2,500. Construction was the only sector to make any significant seasonal gain.

California average weekly hours and average weekly overtime hours in manufacturing reported slight declines in February, of 0.1 and 0.2 hours, respectively.

Prepared in cooperation with the Bureau of Labor Statistics and the Employment and Training Administration of the U.S. Department of Labor by the Labor Market Information Division, Guides and Economic Research Group, P.O. Box 826880, Sacramento, CA 94280-0001

[*] Because of a relatively small sample, the monthly estimates for data in Table 2 do not always appear to reflect real labor market conditions. Therefore, these figures are a three-month moving average instead of monthly data. For example, July's data are an average of May, June, and July. August's data are an average of June, July, and August.

Prepared in cooperation with the Bureau of Labor Statistics and the Employment and Training Administration of the U.S. Department of Labor by the Labor Market Information Division, Guides and Economic Research Group, P.O. Box 826880, Sacramento CA 94280-0001, (916) 427-4660.

State of California / Employment Development Department

NOTE

Employment, average hours, and average earnings estimates for the current month are preliminary and subject to revision. These data are also revised annually, usually in February, to reflect benchmark changes.

FOOTNOTES TO TABLES

A. Does not include employers, own-account workers, unpaid family workers, domestic servants and agricultural workers. Figures for the current month are preliminary and are subject to revision.

B. Does not include force-account and government construction workers.

C. Includes all civilian employees of Federal, State and local governments regardless of the activity in which the employee is engaged.

D. Includes all employees of the city and county of San Francisco.

E. Average hours and earnings are based upon data for full-time and part-time production and related workers in manufacturing and mineral extraction industries, construction workers in construction and nonsupervisory employees and working supervisors in other industries. Average gross weekly and hourly earnings include overtime pay and premium wages for late-shift work. Attention is directed to the fact that these are not wage rates but are averages of the gross earnings.

NOTE: These labor force data are supplied by the U.S. Department of Labor.

HIGHLIGHTS California's seasonally adjusted unemployment rate for April was 8.0 percent, down from 8.5 percent in March. During the past month, the state's seasonally adjusted employment decreased by 43,000 while unemployment decreased by 77,000. The number of job losers decreased from 834,300 in March to 774,500 in April. The number of job leavers increased by 15,000 during the month. The national civilian seasonally adjusted unemployment rate for April was 7.2 percent, down from 7.3 percent in March.

Payroll employment in California grew by a meager 2,100 in April. Job growth in construction and services sectors outpaced the losses in manufacturing. After adjusting for seasonal variations, the job gain was 11,700. The April increase in construction jobs was consistent with the reported increases in January and February residential building permits. Over half of the April's construction job growth was in the special trade category, a gain of 4,200 jobs. The manufacturing sector continues to shrink. Last month California's major aerospace firms reported job losses of 5,500. From one-year-ago levels, aerospace firms have eliminated 34,400 jobs. The services sector added 5,300 jobs in April. Most of the growth was in the two largest components, business and health services.

California average weekly hours and average weekly overtime hours in manufacturing rose in March by 0.5 and 0.3 hours, respectively. Both of these are above one-year ago levels.

*Because of a relatively small sample, the monthly estimates for data in Table 2 do not always appear to reflect real labor market conditions. Therefore, these figures are a three-month moving average instead of monthly data. For example, July's data are an average of May, June, and July. August's data are an average of June, July, and August.

State of California / Employment Development Department

NOTE

Employment, average hours, and average earnings estimates for the current month are preliminary and subject to revision. These data are also revised annually, usually in February, to reflect benchmark changes.

FOOTNOTES TO TABLES

A. Does not include employers, own-account workers, unpaid family workers, domestic servants and agricultural workers. Figures for the current month are preliminary and are subject to revision.

B. Does not include force-account and government construction workers.

C. Includes all civilian employees of Federal, State and local governments regardless of the activity in which the employee is engaged.

D. Includes all employees of the city and county of San Francisco.

E. Average hours and earnings are based upon data for full-time and part-time production and related workers in manufacturing and mineral extraction industries, construction workers in construction and nonsupervisory employees and working supervisors in other industries. Average gross weekly and hourly earnings include overtime pay and premium wages for late-shift work. Attention is directed to the fact that these are not wage rates but are averages of the gross earnings.

[a] Total labor force by place of residence, including workers involved in trade disputes. Employment includes self-employed, unpaid family, and domestic workers.

[b] Range as shown is at the 90% level of confidence.

NOTE: These labor force data are supplied by the U.S. Department of Labor.

HIGHLIGHTS California's economy appears to have reached the trough of the recession but is making little upward progress. The manufacturing sector continues to lose ground, especially in the aerospace and the computer and electronics sectors. The construction sector has shown stabilization but no rebound. Some improvements have occurred in the services sector. The other industrial sectors are flat.

California's seasonally adjusted unemployment rate for May was 8.7 percent, up from 8.0 percent in April. During the past month, the state's seasonally adjusted employment increased by 36,000 while unemployment increased by 114,000. The number of job losers increased from 774,500 in April to 794,600 in May. The number of job leavers increased by 18,300 during the month. The national civilian seasonally adjusted unemployment rate for May was 7.5 percent, up from 7.2 percent in April.

Nonfarm payroll employment in California grew by a meager 26,900 in May. This was less than seasonally expected. All major industrial sectors added jobs in May except the mining and manufacturing sector. After adjusting for seasonal patterns, the May total is 15,300 below April. Most of the job losses were in the manufacturing and trade sectors, with small gains in the construction and services sector. The Labor Department's revised payroll employment estimates for the nation indicated that between June 1990 and January 1992 job losses totaled 2.2 million. This job loss is over one-half million greater than the earlier figures indicated. During that period about one-fifth of those jobs were lost in California. The aerospace and high technology firms in California continue to reduce payrolls. In the last one-year period job losses have averaged over 4,500 per month. Most of these losses were reported in the aerospace sector; however, electronic computing equipment manufactures have also reported significant payroll reductions.

California average weekly hours and average weekly overtime hours in manufacturing fell in April by 0.7 and 0.3 hours, respectively. Both of these are below one-year ago levels.

Prepared in cooperation with the Bureau of Labor Statistics and the Employment and Training Administration of the U.S. Department of Labor by the Labor Market Information Division, Guides and Economic Research Group, P.O. Box 826880, Sacramento, CA 94280-0001.

*Because of a relatively small sample, the monthly estimates for data in Table 2 do not always appear to reflect real labor market conditions. Therefore, these figures are a three-month moving average instead of monthly data. For example, July's data are an average of May, June, and July. August's data are an average of June, July, and August.

Prepared in cooperation with the Bureau of Labor Statistics and the Employment and Training Administration of the U.S. Department of Labor by the Labor Market Information Division, Guides and Economic Research Group, P.O. Box 826880, Sacramento CA 94280-0001, (916) 427-4658.

NOTE

Employment, average hours, and average earnings estimates for the current month are preliminary and subject to revision. These data are also revised annually, usually in February, to reflect benchmark changes.

FOOTNOTES TO TABLES

A. Does not include employers, own-account workers, unpaid family workers, domestic servants and agricultural workers. Figures for the current month are preliminary and are subject to revision.

B. Does not include force-account and government construction workers.

C. Includes all civilian employees of Federal, State and local governments regardless of the activity in which the employee is engaged.

D. Includes all employees of the city and county of San Francisco.

E. Average hours and earnings are based upon data for full-time and part-time production and related workers in manufacturing and mineral extraction industries, construction workers in construction and [illegible] employees and working supervisors in other industries. Average gross weekly and hourly earnings include overtime pay and premium wages for late-shift work. Attention is directed to the fact that these are not wage rates but are averages of the gross earnings.

HIGHLIGHTS After nearly two years of recession in California, there is little evidence of significant economic growth. The housing sector has not rebounded.

California's home building industry shows no sign of rebound. Building permits for housing in April were issued at an annual rate of only 97,300 units, an unseasonably low 1.7 percent increase over March. Compared with the first four months of last year, permits for new residential housing are down by 7.7 percent. Activity in multi-family housing was at its lowest monthly level since December, 1966.

California's seasonally adjusted unemployment rate for June was 9.5 percent, up from 8.7 percent in May. During the past month, the state's seasonally adjusted employment increased by 49,000 while unemployment increased by 139,000. The number of job losers increased from 794,600 in May to 811,400 in June. The number of job leavers decreased by 30,400 during the month. The national civilian seasonally adjusted unemployment rate for June was 7.8 percent, up from 7.5 percent in May.

California's labor market remains weak:

- Nonfarm payroll employment in California increased 24,800 from May to June. This increase was primarily due to a 13,500 increase in employment in the trade sector. However, few sectors performed as well as would be expected from typical seasonal patterns. As a result, on a seasonally adjusted basis, total nonfarm payroll employment fell by 41,100, or 0.3 percent, from May.

- On an annual basis, nonfarm payroll employment has declined 211,300 since June 1991. Large losses continue to be recorded in aerospace and high technology industries. Employment in electronic equipment fell by 16,700 year over year; employment in aircraft and parts firms fell 15,500; guided missiles employment fell 9,800; and scientific instrument employment fell 13,900.

*Because of a relatively small sample, the monthly estimates for data in Table 2 do not always appear to reflect real labor market conditions. Therefore, these figures are a three-month moving average instead of monthly data. For example, July's data are an average of May, June, and July. August's data are an average of June, July, and August.

Prepared in cooperation with the Bureau of Labor Statistics and the Employment and Training Administration of the U.S. Department of Labor by the Labor Market Information Division, Guides and Economic Research Group, P.O. Box 826880, Sacramento CA 94280-0001, (916) 427-4658.

State of California / Employment Development Department

NOTE

Employment, average hours, and average earnings estimates for the current month are preliminary and subject to revision. These data are also revised annually, usually in February, to reflect benchmark changes.

FOOTNOTES TO TABLES

A. Does not include employers, own-account workers, unpaid family workers, domestic servants and agricultural workers. Figures for the current month are preliminary and are subject to revision.

B. Does not include force-account and government construction workers.

C. Includes all civilian employees of Federal, State and local governments regardless of the activity in which the employee is engaged.

D. Includes all employees of the city and county of San Francisco.

E. Average hours and earnings are based upon data for full-time and part-time production and related workers in manufacturing and mineral extraction industries, construction workers in construction and nonsupervisory employees and working supervisors in other industries. Average gross weekly and hourly earnings include overtime pay and premium wages for late-shift work. Attention is directed to the fact that these are not wage rates but are averages of the gross earnings.

NOTE: These labor force data are supplied by the U.S. Department of Labor.

HIGHLIGHTS California has not yet shown any signs of recovering from one of the deepest recessions in its history. Construction activity is still declining, job losses continue, and retail sales are sluggish. The Los Angeles area particularly remains unstable with the unemployment rate climbing to 11.2 percent.

The following highlight the latest movement in major economic indicators:

- Seasonally adjusted retail sales rose at an annual rate of 5.9 percent in June, after increasing at a 4.8 percent rate in May. Since June 1991, retail sales have risen by 3.3 percent, with sales of durable goods up 6.2 percent and nondurables up 1.8 percent.
- Breaking a string of small increases, the index of leading indicators fell 0.2 percent in June. The index had increased 0.6 percent in May, and 0.3 percent in both April and March. The small fall in the index indicates the weakness of the recovery rather than a renewed downturn.
- California's seasonally adjusted unemployment rate for July was 8.9 percent, down from 9.5 percent in June. During the past month, the state's seasonally adjusted employment increased by 54,000 while unemployment decreased by 90,000. The number of job losers increased from 811,400 in June to 819,900 in July. The number of job leavers decreased by 5,400 during the month. The national civilian seasonally adjusted unemployment rate for July was 7.7 percent, down from 7.8 percent in June.

California's labor market remains weak.

- Nonfarm payroll employment in California fell 109,800 from June to July. The decrease was almost entirely due to job losses in education, reflecting the beginning of summer break. Private, state and local education jobs decreased by 131,000. The next largest job change occurred in food processing which gained 12,600 jobs to staff the canning season.
- Seasonally adjusted nonfarm payroll employment remained fairly flat, increasing just 4,100 jobs from June. The increase of 10,700 jobs in service producing industries offset the 6,600 jobs lost in goods producing industries.

*Because of a relatively small sample, the monthly estimates for data in Table 2 do not always appear to reflect real labor market conditions. Therefore, these figures are a three-month moving average instead of monthly data. For example, July's data are an average of May, June, and July. August's data are an average of June, July, and August.

Prepared in cooperation with the Bureau of Labor Statistics and the Employment and Training Administration of the U.S. Department of Labor by the Labor Market Information Division, Guides and Economic Research Group, P.O. Box 826880, Sacramento CA 94280-0001, (916) 427-4660.

NOTE

Employment, average hours, and average earnings estimates for the current month are preliminary and subject to revision. These data are also revised annually, usually in February, to reflect benchmark changes.

FOOTNOTES TO TABLES

A. Does not include employers, own-account workers, unpaid family workers, domestic servants and agricultural workers. Figures for the current month are preliminary and are subject to revision.

B. Does not include force-account and government construction workers.

C. Includes all civilian employees of Federal, State and local governments regardless of the activity in which the employee is engaged.

D. Includes all employees of the city and county of San Francisco.

E. Average hours and earnings are based upon data for full-time and part-time production and related workers in manufacturing and mineral extraction industries, construction workers in construction and nonsupervisory employees and working supervisors in other industries. Average gross weekly and hourly earnings include overtime pay and premium wages for late-shift work. Attention is directed to the fact that these are not wage rates but are averages of the gross earnings.

[a] Total labor force by place of residence, including workers involved in trade disputes. Employment includes self-employed, unpaid family, and domestic workers.

[b] Range as shown is at the 90% level of confidence.

NOTE: These labor force data are supplied by the U.S. Department of Labor.

HIGHLIGHTS There is little sign that the recovery has begun in California; although, the Los Angeles County unemployment rate dropped to 10.7 percent in August. The housing sector remains flat and layoffs continue in manufacturing industries.

Housing construction in California increased in June. The number of building permits for housing increased by 13.7 percent in June over May. For the first six months of 1992, single-family unit building is 3.2 percent above the same period last year. However, construction of multi-family units in the first six months of this year was 37 percent below the same period last year.

California's seasonally adjusted unemployment rate for August was 9.8 percent, up from 8.9 percent in July. During the past month, the state's seasonally adjusted employment decreased by 26,000 while unemployment increased by 148,000. The number of job losers increased from 819,900 in July to 869,600 in August. The number of job leavers increased by 15,600 during the month. The national civilian seasonally adjusted unemployment rate for August was 7.6 percent, down from 7.7 percent in July.

Nonfarm payroll employment in California fell 14,300 from July to August. State and local education lost nearly 30,000 jobs due to the summer staff reductions at schools and colleges. The services sector added 14,600 jobs; manufacturing reported a small gain of 2,600 jobs.

Seasonally adjusted nonfarm payroll employment fell by 34,100 jobs in August. All the major sectors lost jobs except services and finance, insurance, and real estate. The largest number of job losses were in the manufacturing and trade sectors. After seasonal adjustment these two sectors combined lost 28,600 jobs.

California's average weekly earnings in manufacturing fell to $497, a 0.7 percent drop from June. Average weekly overtime increased to 3.8 hours in July, up from 3.7 in June.

*Because of a relatively small sample, the monthly estimates for data in Table 2 do not always appear to reflect real labor market conditions. Therefore, these figures are a three-month moving average instead of monthly data. For example, July's data are an average of May, June, and July. August's data are an average of June, July, and August.

Prepared in cooperation with the Bureau of Labor Statistics and the Employment and Training Administration of the U.S. Department of Labor by the Labor Market Information Division, Guides and Economic Research Group, P.O. Box 826880, Sacramento CA 94280-0001, (916) 427-4658.

State of California / Employment Development Department

NOTE

Employment, average hours, and average earnings estimates for the current month are preliminary and subject to revision. These data are also revised annually, usually in February, to reflect benchmark changes.

FOOTNOTES TO TABLES

A. Does not include employers, own-account workers, unpaid family workers, domestic servants and agricultural workers Figures for the current month are preliminary and are subject to revision.

B. Does not include force-account and government construction workers.

C. Includes all civilian employees of Federal, State and local governments regardless of the activity in which the employee is engaged.

D. Includes all employees of the city and county of San Francisco.

E. Average hours and earnings are based upon data for full-time and part-time production and related workers in manufacturing and mineral extraction industries, construction workers in construction and nonsupervisory employees and working supervisors in other industries. Average gross weekly and hourly earnings include overtime pay and premium wages for late-shift work. Attention is directed to the fact that these are not wage rates but are averages of the gross earnings.
